# NFT CONSULT

FIELD FORCE

## Field Force Solutions

REAL-TIME FIELD WORKFORCE MANAGEMENT

Without visibility into your field teams, you are making operational decisions blind. NFT Consult's Field Force Solution gives managers live GPS tracking, offline-capable mobile data collection, and real-time analytics dashboards, putting complete field visibility in every supervisor's hands.

✓ GPS-Enabled Tracking

✓ Mobile Data Collection

✓ Real-Time Analytics

✓ Offline Capability

✓ Route Optimisation

✓ Performance Monitoring

**THE CHALLENGE**

## When You Can't See Your Field Team, You Can't Lead Them

Dispersed field workforces operating across Africa's varied terrain present a unique management challenge. Without real-time visibility into team locations, task completion, and field conditions, supervisors cannot respond quickly to problems, optimise deployment, or provide the performance data that drives decisions. NFT Consult's Field Force Solution solves this with GPS tracking, digital data capture, and live analytics, all designed to work in low-connectivity environments.

### Zero Visibility

Managers cannot see where field agents are or what they're doing, leading to poor accountability and wasted deployments.

### Paper-Based Data

Manual data collection creates delays, errors, and reporting gaps that slow decision-making and increase operational risk.

### No Analytics

Without live dashboards, managers cannot identify coverage gaps or performance issues as they occur in the field.

**WHY NFT CONSULT**

## The Field Force Partner **Built for Africa**

NFT Consult has managed large, distributed field workforces across East Africa for over two decades. Our Field Force Solution is not a generic platform, it is purpose-built for African operational realities, combining enterprise-grade technology with the people management expertise to make it deliver.

### **Designed for African Conditions**

Offline-first architecture handles low and no-connectivity zones common across East Africa's operational landscape, data captured without internet, synced when connected.

### **Rapid Deployment**

Standard deployment in under two weeks, including agent training, platform configuration, and dashboard setup, managed entirely by our technical team.

### **Flexible Configuration**

Customisable forms, dashboards, and workflows to match your specific field operations and reporting requirements, no one-size-fits-all templates.

### **Dedicated Support**

Ongoing technical support, system monitoring, and platform updates included in your service agreement, with a dedicated account team throughout.

### **Scalable Platform**

Scales from 20 to 2,000+ field agents without infrastructure changes, growing seamlessly with your operational footprint and business needs.

### **21+ Years Field Expertise**

Built on two decades of managing large field workforces across Uganda, Kenya, Rwanda, and the UK, operational experience that informs every platform decision.

## Get Your Field Teams **Under Control**

From distribution networks to field survey teams, NFT Consult deploys Field Force Solutions that give your operations the real-time visibility they need. Talk to our team today.
